

Minimal Music 聴取時における脳機能計測

森 悠太、風井 浩志、片寄 晴弘

聴取者が「浮遊感」を感じるというMinimal Music(以下、MM) に注目し、音楽聴取時における脳機能計測を実施した。他の音楽と比較し、MM 聴取時には右前頭前野における脳血流が増加する傾向が観測された。

Measurement of Brain Activity while listening to Minimal Music

Yuta MORI, Koji KAZAI, and Haruhiro KATAYOSE

We investigated humans' brain activity while listening to the Minimal Music, which is regarded to bring the flowing sensation to the listener's mind. The experimental results suggested that brain activity is more activated in the right DLPFC while listening to the Minimal Music, compared with the other music genres.
