

**コンテンツのデザイン支援技術による社会貢献を目指して  
近未来チャレンジセッションでの議論より**

平田 圭二、片寄 晴弘、笠尾 敦司、宮田 一乗、原田 利宣

**Toward Contribution of Contents Design Support Technology to Public  
Based on Discussion at near Future Challenge Session**

Keiji Hirata, Haruhiro Katayose, Atsushi Kasao, Kazunori Miyata, Toshimobu Harada

Summary: We held the third meeting at the 19<sup>th</sup> Annual Conference of JSAI in the series of near-future challenge of Establishing Case-Based Design Support and Assessment Framework. In this Research Notes, following the presentations and discussions made at the meeting, we investigate how we bridge the gap between our design support technology and the contributions to public. We first discuss design support technology for contributing to society development in general, and, then, apply a brief case study to a picture generation system, regarding community support as a contribution to society development. Finally, we briefly mention future work and present “call for participants” for our next session in 2006.
