HR-STEM images of LPSOs

Model of solute conf.

Prof. Abe at Tokyo.

HAADF-STEM image of Mg-Al-Gd LPSO

Prof. Kishida and Prof. Inui at Kyoto

3D-AP of Mg-Zn-Y

Prof. Nagai of MRI at Tohoku

- ◆ Stacking order
- Quasi-harmonic Free energy shows 18R stability at high temperatures.
- But the energy difference is very small comparing to  $k_B T$ .

Ilkubo, Tokunaga, and Otani at KyuTech.

for formation mechanism,  
from structure energies...

- ◆ Stacking order
- ◆ Zn, Y in hcp, fcc-Mg
- ◆ Zn, Y solute ordering? in hcp-Mg

# stacking fault and partial dislocations

for formation mechanism,  
from structure energies...

- ◆ Stacking order
- ◆ Zn, Y in hcp, fcc-Mg
- ◆ Zn, Y solute ordering? in hcp-Mg
- ◆ before those, in Si (+P,B)

# ◆ Two Scenarios

- Controlling process
  - ▶ Stacking fault
  - ▶ Zn-Y pair diffusion or ordering

Stacking fault

- : hcp Mg
- : fcc Mg
- : Zn-Y pair

Mg-TM-RE  
Mg:1.6A  
Zn:1.39A  
Y:1.8A

$$\begin{aligned}
 \Delta E_{\text{hcp}} &= E_{\text{pair}} - E_{\text{isolated}} \\
 &= -0.11(\text{adjacent}) \\
 &\sim -0.20(\text{in plane}) \\
 &[\text{eV/pair}]
 \end{aligned}$$

# Scenario No.1: Stacking fault induced

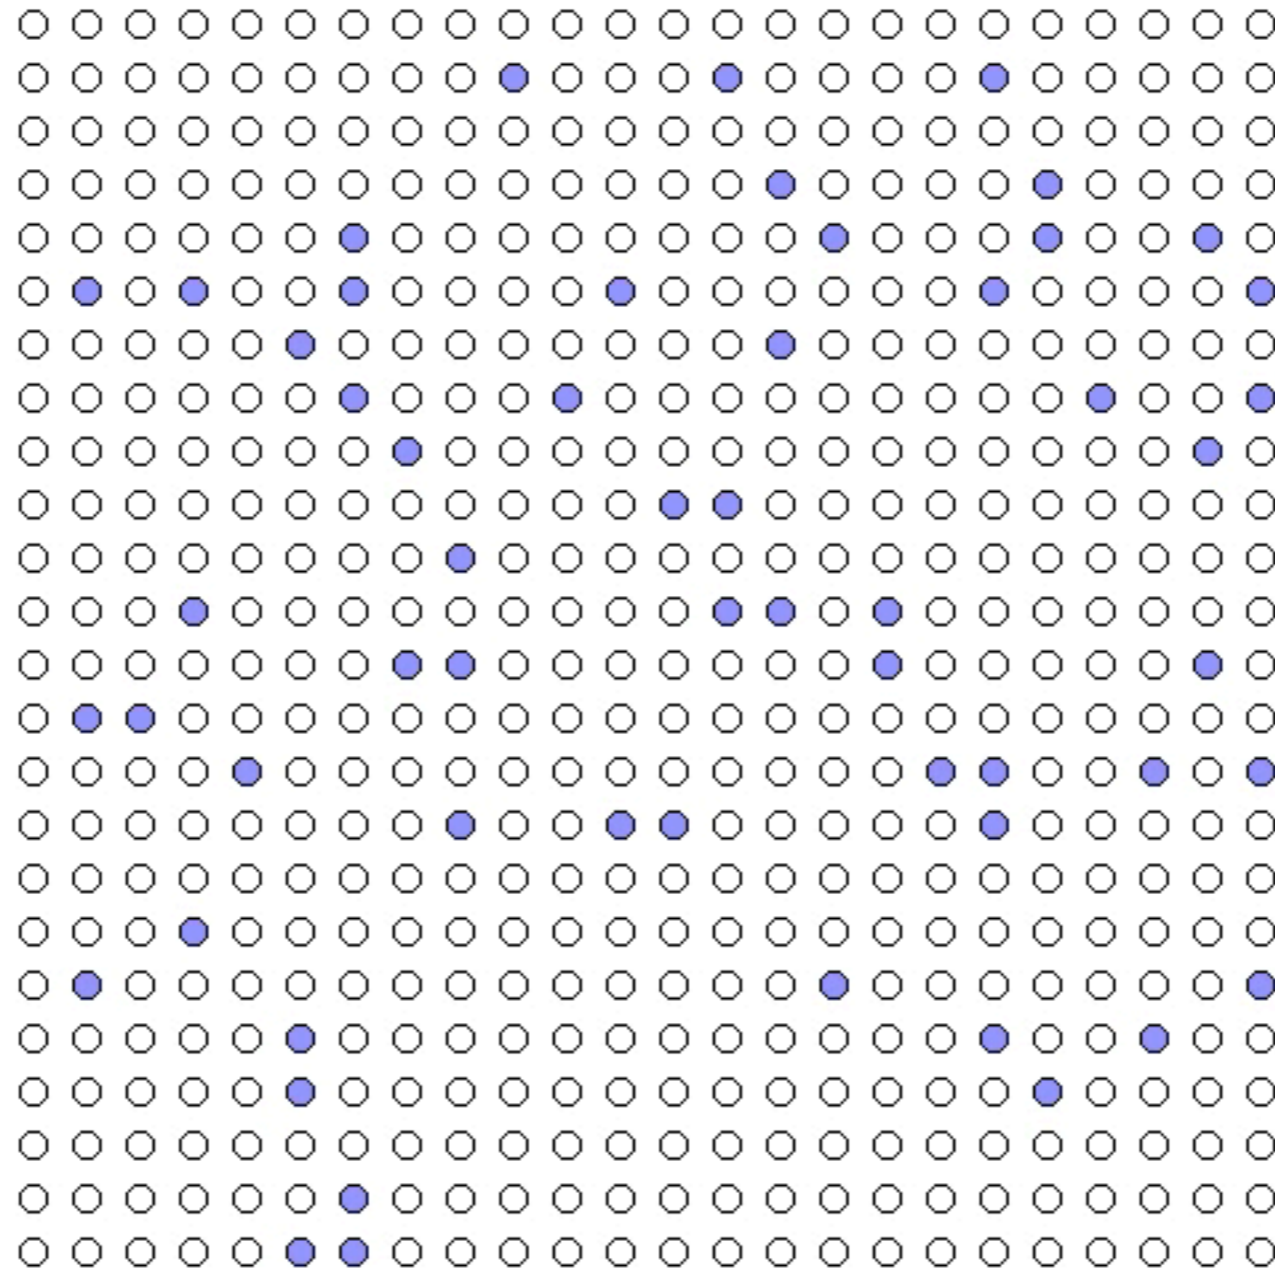

# Scenario No.1: Stacking fault induced

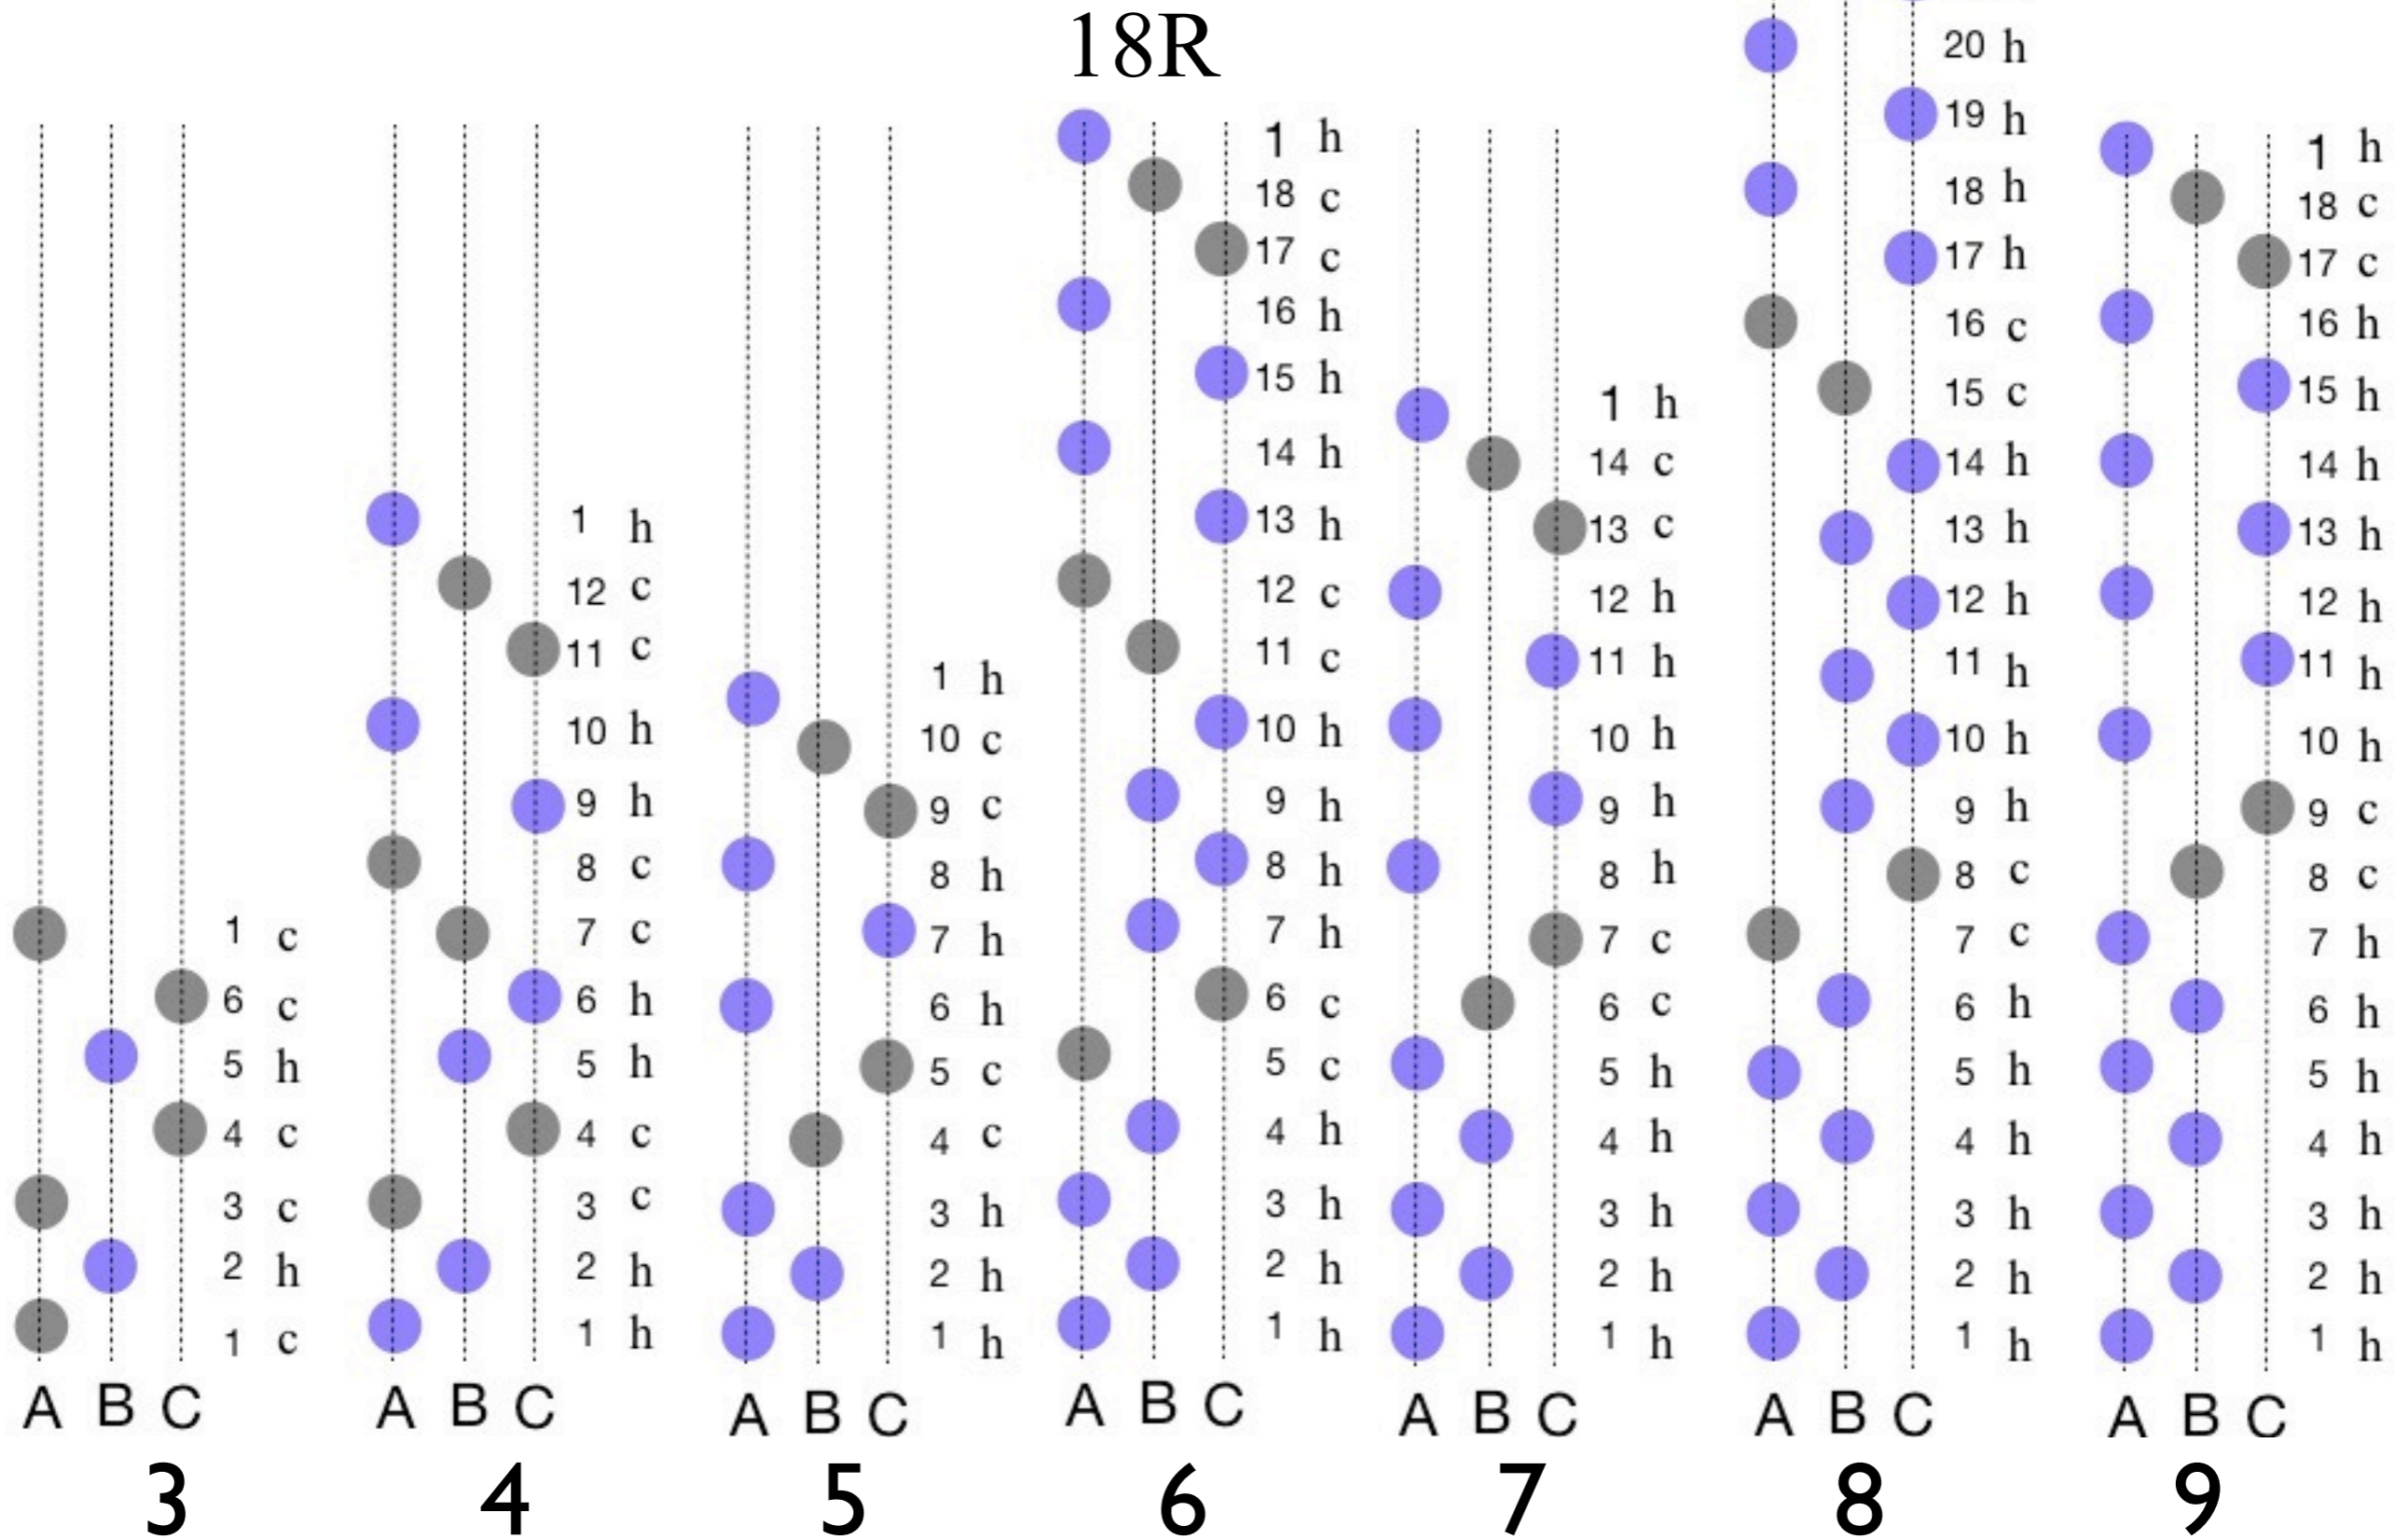

Scenario No.2:  
Diffusion control or  
solute ordering induced

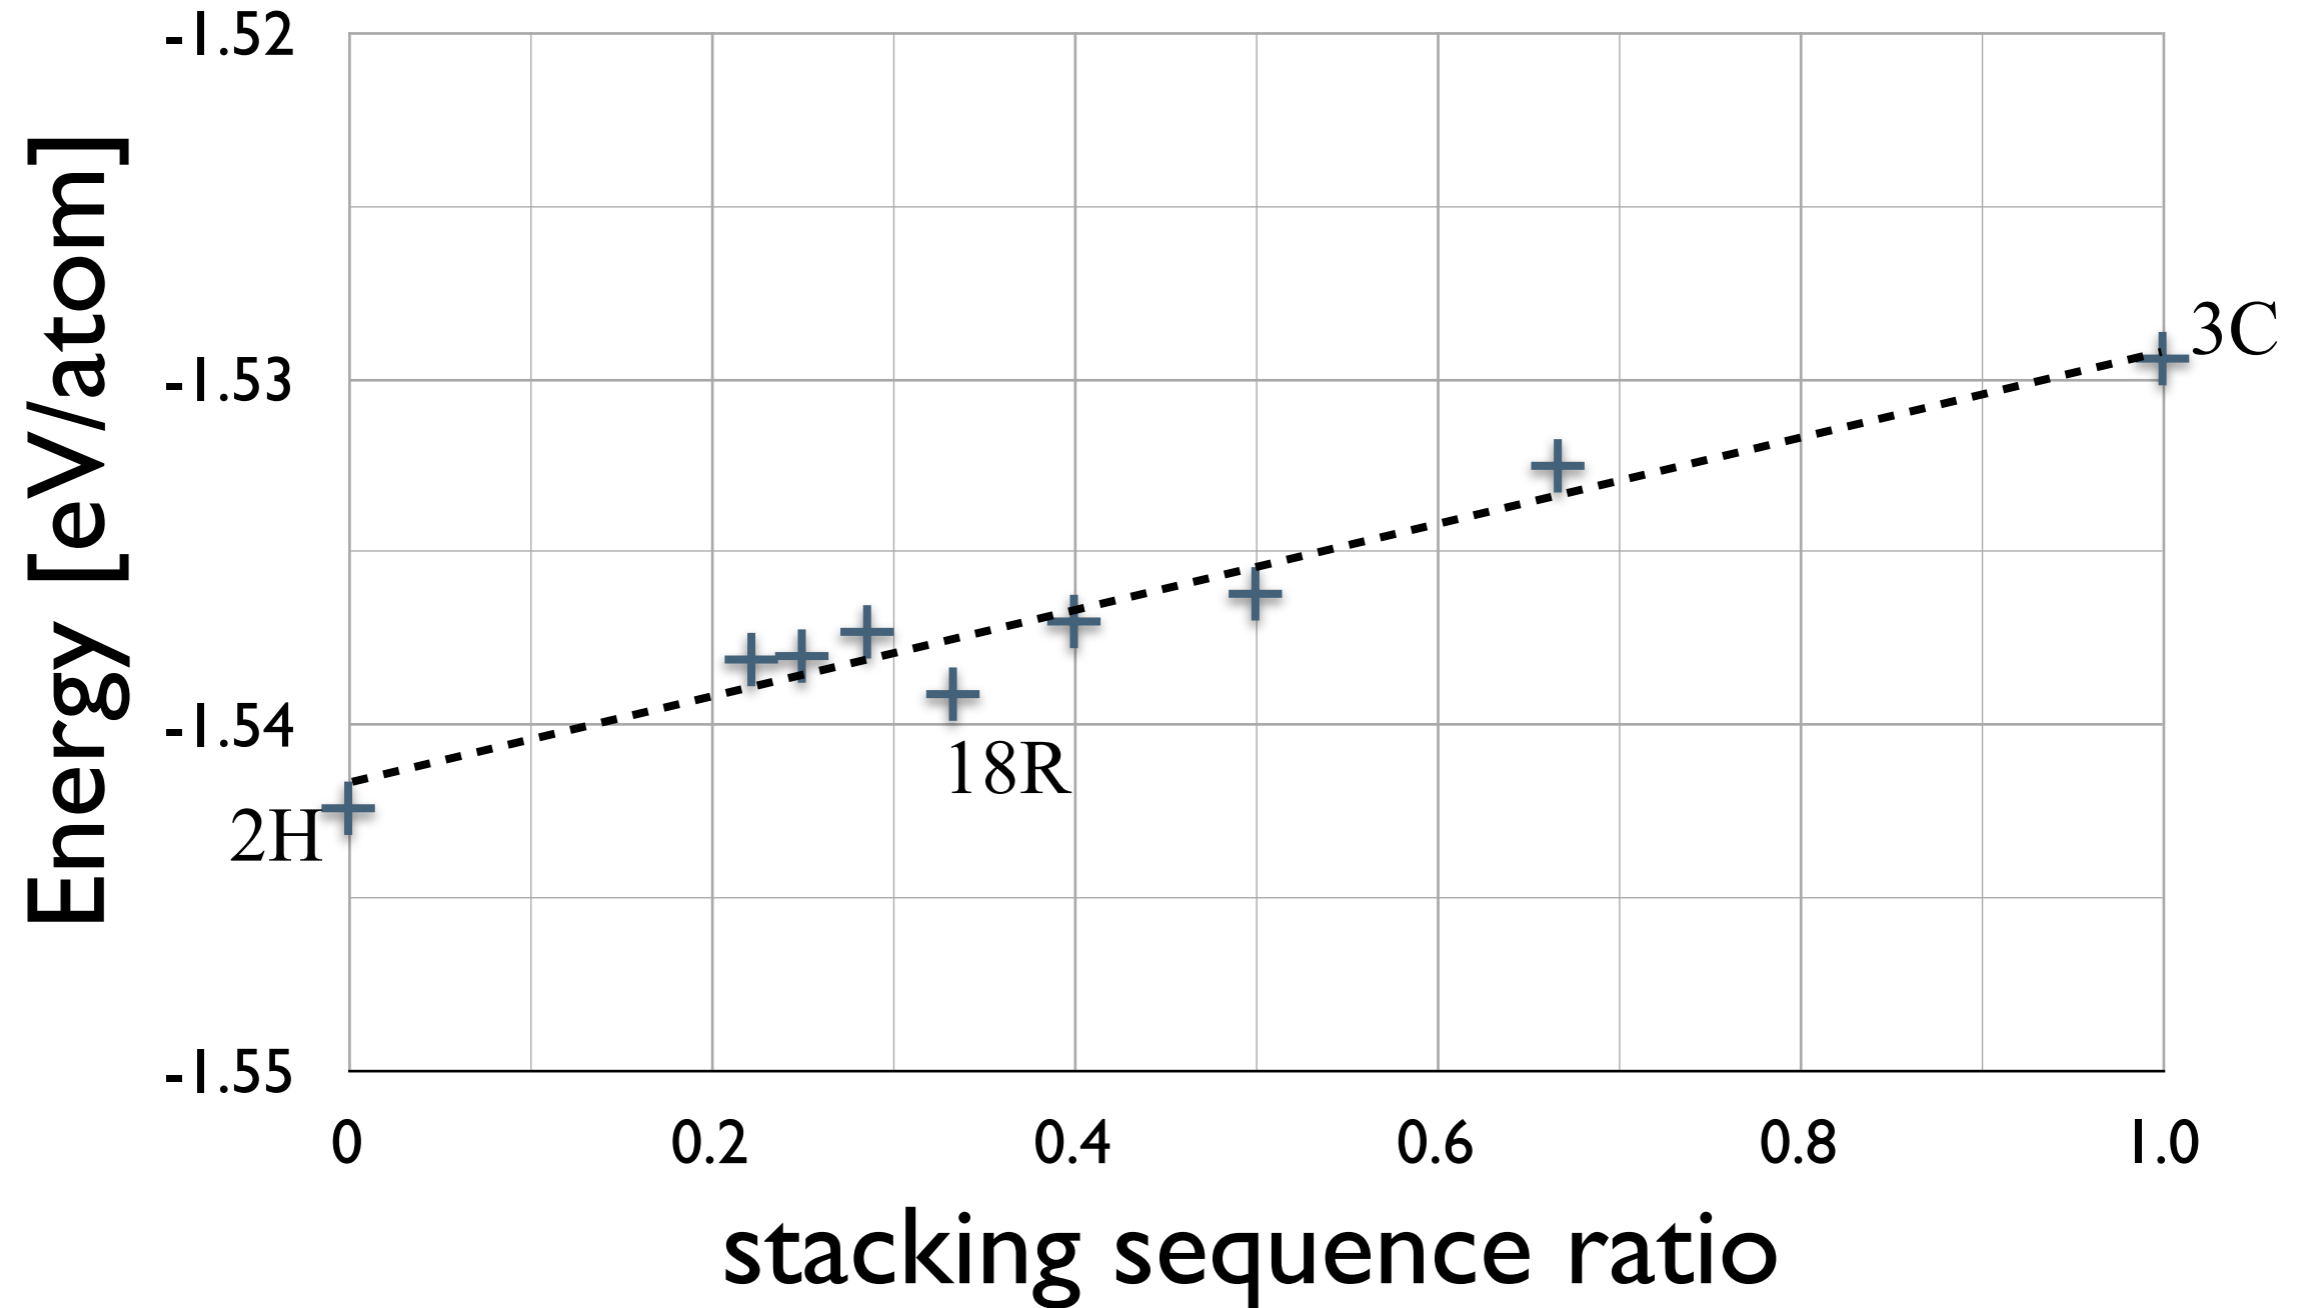

# Scenario No.2: Diffusion control or solute ordering induced

# Stacking order in Mg

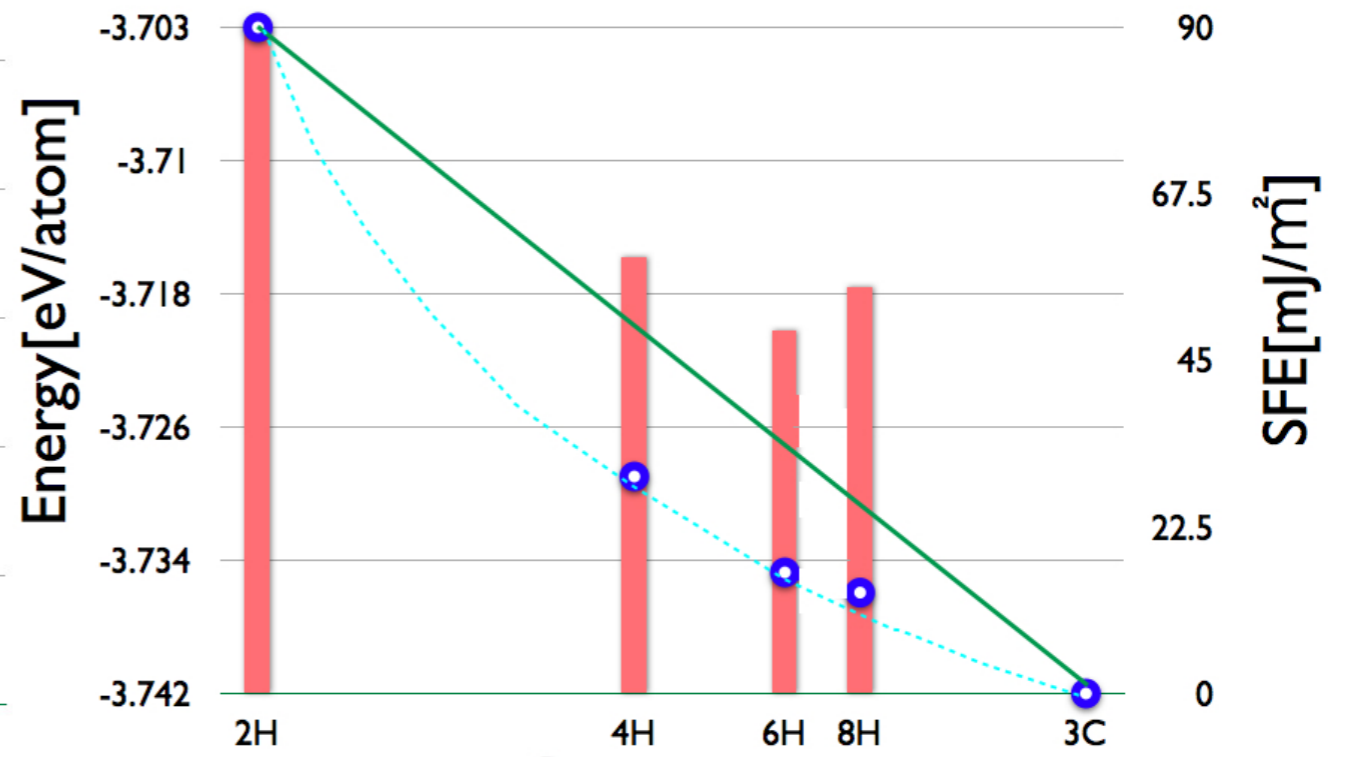

# Energy change on stacking sequence ratio

# Cu

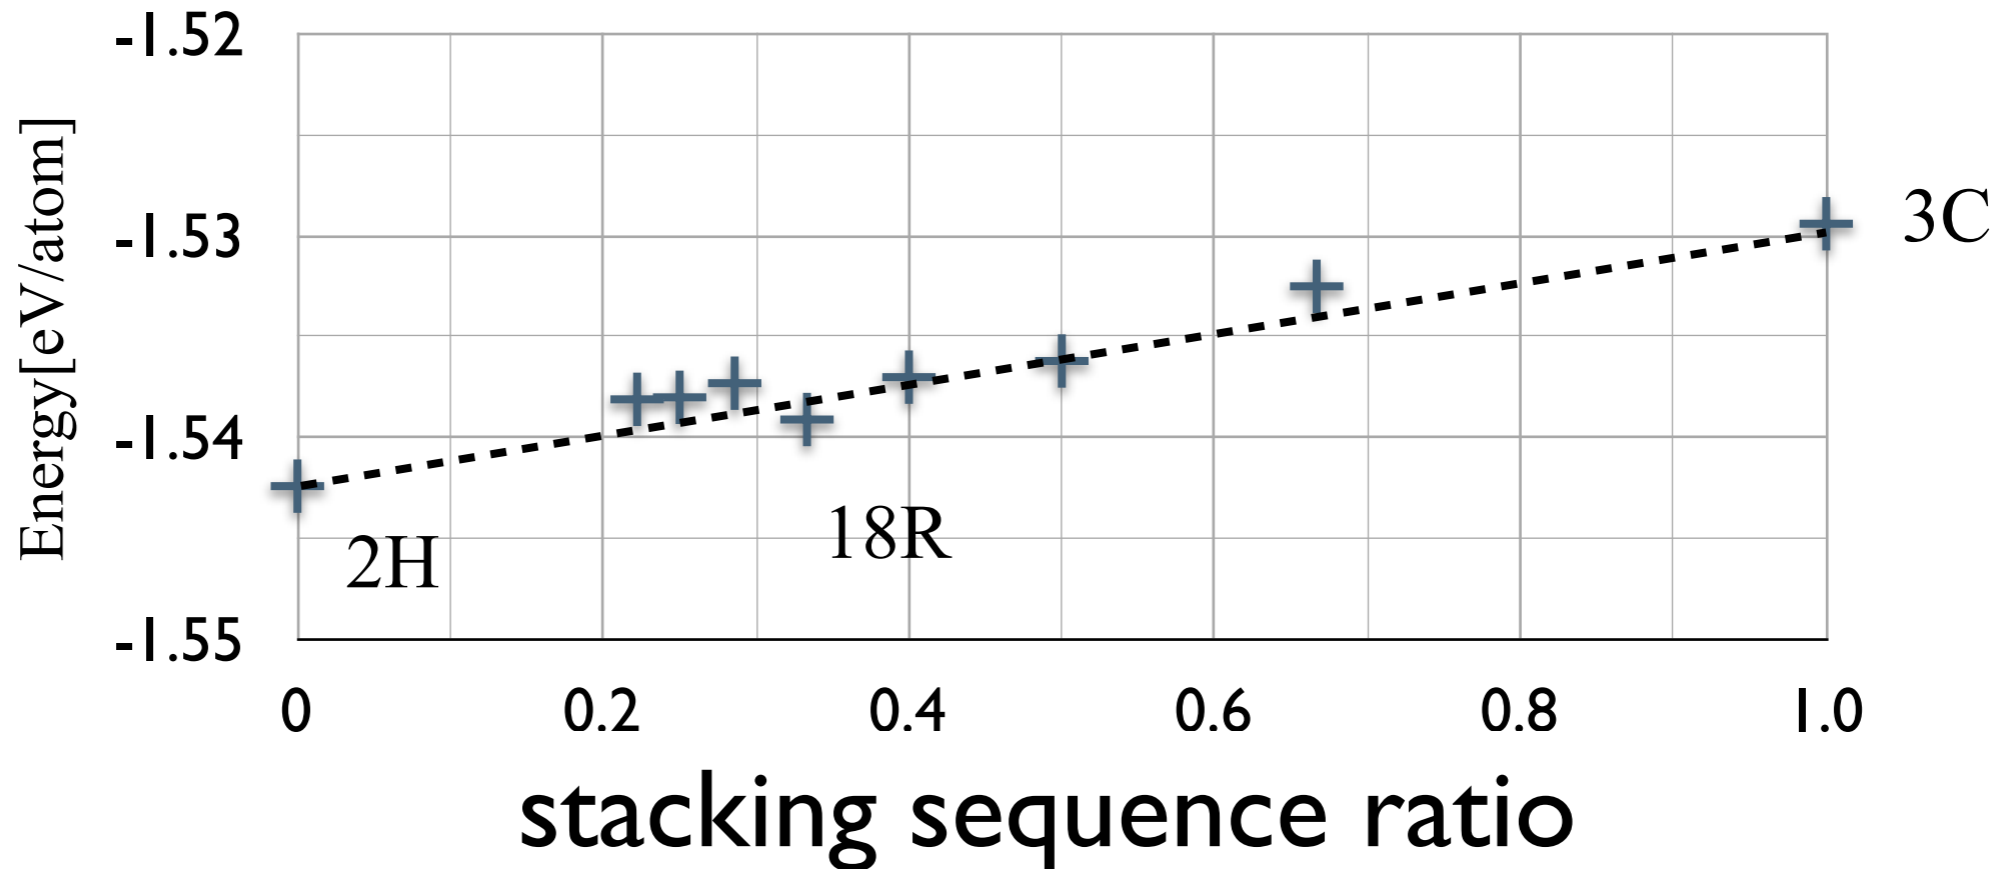

# Al

stacking sequence ratio

stacking sequence ratio

# ◆ Two Scenarios
